

Northern Open MRI *Resonance*

October 2009

Letter From Marketing:

Hello

Northern Open MRI is still exploring ways to become an integral part of the community health care market by giving physicians and their patients additional services for convenience and comfort.

We are adding more services! We are in the final stages of integrating ERAD Pacs system to our facility. It should be fully operational by the Middle of August. Those that are not familiar with the technology can see the paragraph to the right. This advancement not only allows to streamline the reports process even more, it allows for faster interaction of the Physician and patient.

We are working on a more simplified test form for you to send along with the order for the testing that you desire.

We are exploring the opportunity of becoming a Quest Diagnostic Access Point. Giving your patient another outlet to get medical diagnostic testing quickly and comfortably.

How about a CT Scan? We are also looking at adding this modality to our facility. Your thoughts on this addition would be appreciated.

We are here to work with you to minimize the turnaround time for your testing. If you have any suggestions how we can better improve, do not hesitate to let us know!

Sincerely,
Christopher J. Midlock
Manager, Marketing and Business Development
